

THIN GOLD SHINE

We recently underwent a center upgrade/remodel. Brent was our most instrumental employee to make sure everything was taken care of. We had to move everything from our center (completely gutted) and move to our emergency operations center that is in a different city of the county. Brent ensured a fluid transition and had all equipment setup for live calls and live CAD to work on the date of transfer.

While everyone else was operating out of the EOC, Brent was working with Vendors, installers and County Building Crews to orchestrate our new remodel! On top of these additional tasks, Brent was still responsible for manning his normal day to day functions as a CAD administrator for 14 Police Departments and 16 Fire Agencies.

Today 8/26/22 I am happily writing this from our newly renovated Dispatch Center! This process or transformation wouldn't have been possible without Brent and his dedication to the center. This upgrade has allowed for a better morale boost for our employees. His over-the-top support for his fellow employees allowed every step of the process to be an easy transition. He is truly the backbone of our agency!
